

Dam height = 28.3 m

1 layer = 1.5 m

$$28.3 \div 1.5 = 19 \text{ pours}$$

Every pour has a week curing time.

$$19 \times 7 = \underline{133}$$

$$\text{Dam V} = 7500 \text{ m}^3 \quad \frac{7500}{133} =$$
